

To ensure that the final LIWP-LMF incentive does not exceed project costs, contractors must report all installation costs incurred on the project as well as provide supporting documentation. Final solar installation agreement is required to be submitted at project completion. The Program retains the right to request additional documentation to support the submitted project's costs, such as equipment invoices, prior to approval and disbursement of LIWP incentives. Please provide total costs incurred for the following:

PV Modules (materials only)	\$
Inverter(s) (materials only)	\$
Permitting Fee¹	\$
Balance of System (BOS)²	\$
Extended 20-year Inverter Warranty³	\$
Total Cost	\$

By signing below, the contractor certifies that the above reported costs are accurate and pertain directly to the installation of a solar project that is receiving LIWP-LMF incentives. This Project Cost Affidavit form must be submitted concurrent with the submission of the PV Statement of Completion form.

¹ Only include the cost of the permitting fees charged by the permitting agency. Do not include any costs associated with time and labor in applying for permits.

² All other eligible costs associated with the installation of the PV, including labor. For a complete list of eligible costs, see the last page of this document.

³ Only applicable to tenant offsetting systems.

ELIGIBLE INSTALLATION COSTS

The following eligible costs associated with the installation of the solar PV system may be included in the total eligible project cost:

- 1) Solar equipment capital costs, including tracking systems and other ancillary equipment associated with the solar energy system
- 2) Engineering and design costs for solar energy systems
- 3) Construction and installation costs. For project in which the generation equipment is part of a larger project, only the construction and installation costs directly associated with the installation of the energy generating equipment are eligible
- 4) Engineering feasibility study costs
- 5) Interconnection costs, if applicable, including:
 - a. Electric grid interconnection application fees
 - b. Metering costs associated with interconnection
- 6) Building permitting costs
- 7) Standard warranty and/or maintenance contract costs associated with eligible project cost equipment
- 8) Sales tax and use tax
- 9) On-site system measurement, monitoring and data acquisition equipment
- 10) Customers may claim certain mounting surface costs as eligible project costs. Costs may include mounting surfaces for the photovoltaic module/solar collector and/or the materials that provide the primary support for the modules
- 11) Cost of capital included in the system price by the vendor, Contractor or Subcontractor (the entity that sells the system) is eligible if paid by the System Owner
